MANAGED IT SERVICES

Enterprise-Quality IT services for SMEs. Unparalleled success in managed IT services, managed cybersecurity, cloud solutions, data storage, connectivity and strategic IT consulting.

MANAGED CYBERSECURITY

Our managed cybersecurity solutions follow the recommendations of the most widely accepted and proven cybersecurity authorities, whether you're simply looking to protect your business from cybercriminals or need to meet compliance requirements.

CLOUD SOLUTIONS

Custom cloud solutions. Increased productivity, cybersecurity, and scalability with the latest in cloud technology. We develop optimized, custom cloud solutions that leverage market-leading products including Office 365, Microsoft Azure, and the FCA Virtual Cloud to move your business forward.

IT INFRASTRUCTURE SOLUTIONS

Shape your future within your premises with confidence. From desktop computers, servers, and peripherals to networking equipment, connectivity solutions, and firewalls, we provide tailored solutions for your on-premises technology.

BIG ENOUGH TO BE COMPETITIVE, SMALL ENOUGH TO BE FLEXIBLE

Our Services

We have an unparalleled success record in delivering business solutions throughout South Africa and the African Continent with existing clients in Lesotho, Zambia, DRC, Mali, Sierra Leone and Burkina Faso

Fully registered exporter and importer with South African authorities

Strong partnerships with freight handlers and cargo management for delivering to difficult areas

Our Attitude

Sure we can

YES WE CARE AND SIMPLIFY

CLIENT TESTIMONIAL

"First Consulting Alliance is our trusted IT service provider and the combination of their great service delivery and the secure environment created by our Sophos security protection, enable us to operate efficiently whilst knowing that our business is protected against cyber attacks."

L DE ZOETEN

Financial Director, Q.I. Logistics

UNIFIED COMMUNICATIONS

We provide and combine multiple enterprise communications channels, such as voice, video, personal and team messaging, voicemail, and content sharing.

EMAIL MANAGEMENT

We systematically control the quality and quantity of electronic messages that are sent from within, and received by, an organization.

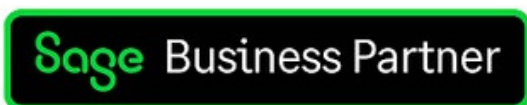

IT INFRASTRUCTURE

We manage both technical and operational components -including hardware, software, policies, processes, data, facilities and equipment - for business effectiveness
